Strategic Planning in the Public Sector

Applying Best Practice in Economic and Social Development Projects

INTRODUCTION

Strategic planning in the public sector is a challenging and exciting subject. There is a significant and growing emphasis in the sector on project outcomes, value for money and financial efficiency and also on the changing relationship between public and private institutions. Today public sector organisations are increasingly required to plan strategically for their future by using the tools and techniques that have been developed in the private sector. All this is the focus of our new course.

This highly participative EuroMaTech training course will address the major issues of setting strategic objectives, planning programmes and projects and preparing for the future. We will also look in detail at the way in which we evaluate the outcomes of public sector strategic decisions and we will offer guidelines on developing and integrating strategic and operational activities for the purpose of achieving and sustaining high-level performance in economic, social and business development. Measuring economic and business impact will figure significantly in this training course, which we intend to sharpen the focus of all public sector personnel on the quality of operational outputs and strategic outcomes. It will give participants a 'road map' on which the future of the organisation can be confidently based.

Participants attending Strategic Planning in the Public Sector training course will develop the following competencies:

- Understand the value of strategic analysis for public sector organisations
- Learn how to transfer, adapt and apply best practice from the private sector
- Align public sector operations in support of the private sector
- Balance the requirements of economic development and business growth
- Make a significant contribution to preparing a strategic plan for their organization

WHO SHOULD ATTEND?

This Strategic Planning training course is suitable for a wide range of professionals employed in public sector institutions, but will be particularly beneficial to:

- Programme Managers in Economic Development
- Urban Spatial Planners
- Major Project Managers
- Financial Planning and Forecasting Specialists
- Scientific and Technological Policymakers
- Internal Auditors and Management Accountants

PROGRAMME OBJECTIVES

The EuroMaTech training course on Strategic Planning in the Public Sector aims to help participants to develop the following critical objectives:

- Understand the meaning and impact of strategic thinking
- Know how to apply the main analytical tools and techniques
- Develop skills in project specification and scheduling
- Apply the most effective approaches to strategy formulation
- Combine and leverage analytical and creative thinking
- Achieve targets and performance standards during periods of change
- Build strong public-private relationships in development activities
- Gain commitment of their teams to the process of strategic development

TRAINING METHODOLOGY

This Strategic Planning in the Public Sector training course will combine presentations with instructor-guided interactive discussions between participants relating to their individual interests. Practical exercises, video material and case studies aiming at stimulating these discussions and providing maximum benefit to the participants will support the formal presentation sessions. Above all, the course leader will make extensive use of case examples and case studies of issues in which he has been personally involved.

PROGRAMME SUMMARY

This unique EuroMaTech training course on Strategic Planning in the Public Sector covers discussion of critical areas of strategic thinking and planning and will have above all a practical focus on decision-making in conditions of complexity that include public accountability.

The focus of this course is on the actions required to achieve effective design and introduction of strategic plans. This will include detailed presentation and discussion of contemporary leading-edge approaches to strategic planning, showing how standard systems should be modified for the specific context of a public sector organisation.

IN-HOUSE TRAINING

EuroMaTech is capable of conducting this training programme exclusively for your delegates. Please e-mail us on inhouse@euromatech.ae for further information and/or to receive a comprehensive proposal.
