Budgeting, Cost & Decision Making

INTRODUCTION

All business decision making involves analyzing situations and assessing alternatives, risks and benefits. This EuroMaTech Online training course offers an opportunity to acquire and then deploy new skills and ideas to achieve improved financial operations and strategies. The knowledge acquired will enhance the budget process and control processes through a variety of strategies and techniques that will provide new insights to how financial performance can be enhanced.

In this online training course you will participate in many aspects of modern thinking:

- Budgets and Models as a key element of management and financial strategy
- The analysis of opportunities, risks and rewards in the context of Capital Projects
- Controlling costs by analysis, modelling, KPI's and review of the cost drivers
- Develop a broader view in the context of the enterprise's objectives and constraints

WHO SHOULD ATTEND?

- Both financial and non-financial professionals at all levels
- Delegates with a financial background will enjoy the opportunity to broaden their knowledge base in aspects of budgeting and cost control that may not be part of their current responsibilities or experience
- By participation in this course, participants whose background is not in the financial sector will gain an understanding of both the strategic and the technical aspects of budgeting and cost control involving both the financial and the operational opportunities for performance improvement
- At the conclusion of the course all delegates will gain a strong understanding of the practicalities; techniques and strategies of budgeting and cost control that will both enhance their effectiveness and contribution in their current role and their career opportunities based on the skills and insights acquired

PROGRAMME OBJECTIVES

The Budgeting, Cost & Decision Making EuroMaTech online training course will enable participants to achieve the following objectives:

- Understand the importance of a well-defined budget process and create budgets relevant to your organization
- Acquire costing and budgeting terminology and techniques
- Master methods for risk, payback and cost-benefit analysis
- Learn how to integrate profit, cash and balance sheet plans and budgets
- Using 'what-if' and Stochastic Models to evaluate probable outcomes and ranges of variances and identify key drivers for corrective actions
- Understand the use of Present Value, IRR and discounted cash flow (DCF) to support investment and financial decision making

TRAINING METHODOLOGY

Participants will learn by active participation during the online training course, by using following blended learning techniques for an engaging online delivery of this course:

- Interactive course delivery through live virtual training room
- Whiteboards & screen sharing
- PowerPoint presentations
- Case Studies, exercises, problem solving
- Infographics and videos

PROGRAMME SUMMARY

This online EuroMaTech training session is presented in a manner that will make budgeting, costing and decision-making techniques more easily understood by people from every discipline across the organization. Case studies and practical exercises are used to emphasize key issues and underpin learning by relating them to typical business scenarios.

Delegates will progress through the underlying accounting principles, the application of various techniques to evaluate capital projects and the use of analysis to both understand and manage costs. They will then engage in practical steps to building budgets and conclude by gaining experience in the various developments in organizational and strategic analysis that can enhance the fundamental operational and behavioral aspects of an effective organization.

PROGRAM OUTLINE
