Business Process Optimisation and Modelling

Innovation, Integration and Development

INTRODUCTION

Business Process Optimisation and Modelling are essential components of Business Process Redesign (*BPR*), strategic development of organisational capabilities, as well as other business process improvement initiatives such as business process management (*BPM*), re-engineering, systems development, quality management and continuous process improvement.

In this EuroMaTech training course, participants will acquire knowledge and skills to develop a strategically aligned approach to business process optimisation; learn how to analyse and accurately model business processes from the enterprise level through to detailed workflow representation at the operational and project level. Participants will extend their ability to design effective organisational structures, activities and processes, and will acquire knowledge and skills to map and model business processes, measure and evaluate workflow and activities, and assign process owners.

Participants attending EuroMaTech's Business Process Optimisation and Modelling training course will develop the following competencies:

- Learn and apply a systematic approach to effective analysis of business processes
- Acquire skills to ensure that business process models accurately reflect reality and include all stakeholder requirements
- Understand how to use Business Process Modelling Notation (*BPMN*)
- Discover how to make best use of the International Institute of Business Analysis (*IIBA*) Business Analysis Body of Knowledge® (*BABOK*®)

WHO SHOULD ATTEND?

The Business Process Optimisation and Modelling training course is suitable for a wide range of professionals including, but not limited to:

- Operations Managers
- Project Managers
- Process Managers
- Business Architects and Analysts
- Systems Architects and Designers
- Quality Managers

PROGRAMME OBJECTIVES

EuroMaTech's Business Process Optimisation and Modelling training course aims to enable participants to achieve the following objectives:

- Understand business processes and their components
- Apply process analysis, planning, and measurement concepts and techniques to their own organizations processes
- Define processes using the Business Process Modelling Notation (*BPMN*) standard
- Apply *IIBA*® *BABOK*® best practice business analysis standards
- Develop a business process architecture
- Analyse process customer requirements
- Specify measures of business process performance (*KPIs*)
- Diagnose the health of a business process
- Use process improve techniques to transform business processes

TRAINING METHODOLOGY

Participants on the Business Process Optimisation and Modelling training course will learn by active participation during the seminar through the use of a wide variety of instructional techniques, including process mapping. There will be group exercises to allow for a "hands on" approach to learning. Rapid learning of the methods and techniques is achieved by means of group work, participant discussion, facilitator interaction and constructive feedback.

PROGRAMME SUMMARY

In this EuroMaTech training course, delegates will acquire the strategic thinking, knowledge and skills to create, develop, evaluate, and perform business process design and optimisation, and to deliver and collaborate on business analysis application. Delegates will use methods and tools from the *IIBA*® *BABOK*®, and apply Business Process Modelling Notation (*BPMN*) standards and practice.

The main focus of the Business Process Optimisation and Modelling training course is to provide delegates with knowledge, understanding and practice, to stretch their analytical skills for business process mapping, requirements gathering, and process integration and alignment at the enterprise management, operational management, and task level.

PROGRAM OUTLINE

DAY 01

Understanding Business Processes

- The process views of organisations: *an introduction to business processes*
- Types of business processes
- Identifying and naming business processes (*definitions and design*)
- How to analyse the components of a business process
