Gas Processing

INTRODUCTION

Natural or associated gas as well as refinery off gases may contain a number of acidic contaminants, primarily H₂S and CO₂, inert gases, helium and nitrogen and in rare cases Radon. Removal of these acidic components can be divided into two broad categories, chemical and physical. Sometimes a mixture of chemical and physical solvents are used either in a continuous or batch process.

This Gas Processing training course concentrates on treatment processes in the entire natural gas value chain, from discovery, exploration and transportation through to sales and marketing. The H₂S can be converted to sulphur using a modified Claus Sulphur Recovery unit. Each of the various sulphur recovery processes is examined and their chemistry explored in detail. Other techniques that will be covered include Shell's greener alternative Thiopaq.

This EuroMaTech Gas Processing training course will feature:

- Origins and chemical characteristics of Natural Gas
- Gas Treatment Technologies and Processes
- Amine Systems and Physical Solvents Design Criteria
- Troubleshooting Gas Sweetening and Sulphur recovery Units
- All the current Sulphur Recovery Technologies

WHO SHOULD ATTEND?

- Production and Processing Personnel
- Operations Staff, and Shift Supervisors
- Environmental Specialists
- Facilities and Process Engineers
- Geologists and Reservoir Engineers
- Line Managers, and Sales or Business Development Staff
- Industry Newcomers

IN-HOUSE TRAINING

EuroMaTech is capable of conducting this training programme exclusively for your delegates. Please e-mail us on inhouse@euromatech.ae for further information and/or to receive a comprehensive proposal.

PROGRAMME OBJECTIVES

- Appreciate the Many Aspects of Gas Treating and Sulphur Recovery Processes
- Identify the Main Process Steps and Discuss the Key Features of Gas Treating
- Demonstrate an Understanding of Many Facets of Amine Sweetening Technologies
- Understand the Technology, Chemistry and Thermodynamics of Gas Processing
- Evaluate, Monitor, and Troubleshoot Gas Treating Operations

TRAINING METHODOLOGY

This EuroMaTech Gas Processing training course is highly interactive, applied and stimulating learning experience, with presenter led opportunities to advance ones opinions and ideas through discussions, workshops, class exercises, case studies and examples.

To ensure a thorough understanding of the concepts introduced during the programme a mix of learning methods will be used, including lecture style presentations, open discussion and group work.

PROGRAMME SUMMARY

Gas processing gives a versatile overview of the gas conditioning and processing industry. It is designed for a broad audience and is both participative and interactive. It covers the technology and engineering principles and is recommended for those needing an overview of the industry and the processes and equipment used.

Selection and evaluation of processes used to dehydrate natural gas, meet hydrocarbon dewpoint specifications and extract NGLs will be thoroughly covered and will highlight the issues to the industry on important specifications for gas, NGL and condensate Physical/thermodynamic property correlations and principles to the operation, design and evaluation of gas processing facilities, including practical rule of thumb equipment sizing methods for major process equipment.

In closing the attendees will recognize and develop solutions to a range of operating problems and control issues in gas processing facilities.

PROGRAM OUTLINE

DAY 01

Natural Gas Processing

- Physical properties of hydrocarbons
- Terminology and Nomenclature
- Qualitative Phase Behavior / vapor-Liquid Equilibrium
- Definition and objectives of treating
- Types of Contaminants and dealing with impurities
- Health, Safety and Environmental Considerations
- Gas specifications and Gas Processing Options
- Sales Gas and Product Specifications
- Dew Point Control / Liquids Recovery
- Cost impact and the economics of Gas treating and Sulphur Recovery

DAY 02

Chemical Reaction Processes

- Chemistry of Amine Gas Sweetening
- Amines in commercial use – *Comparison and Selection*
- Alkanolamine Processes General Design Criteria
- Process Flow Schemes and Process Control
- Equipment review:
 - » Fractionation and Separation Equipment
 - » Heat Transfer Equipment
 - » Pumps, Compressors and Drivers
 - » Refrigeration in Gas Conditioning and NGL Extraction Facilities
 - » Simulations, calculations and sizing examples
 - » Filtration
 - » Material selection and metallurgical issues
- General Operating Problems: Heat Stable Salts, Corrosion and Foaming

DAY 03

Common Process Being Used In Gas Processing Industries

- Physical processes: Theory and principles
 - » Selexol, Fluor, Rectisol, Purisol
- Alkaline Carbonate Salt Processes: Overview and Configurations
 - » Hot Potassium Carbonate Plants, Benfield HiPure, Catacard
- Hybrid Processes:
 - » Sulfinol (O/ M/ X),
- Batch and non Regenerable Processes: Advantages, range and disposal
 - » SulfaTreat, Sulfa-Check, Chemsweet, Iron Sponge, Puraspec, Molecular Sieve
- Liquid Hydrocarbon Treating:
 - » Regenerated Caustic, Perco Solid Copper Chloride, Molecular Sieve, MerOx
- New Treating Technologies

DAY 04

Sulphur Recovery Overview (I)

- Overview, Typical PFD and Process Considerations
- Mechanical Considerations and Instrumentation
- Claus and SuperClaus Process and Modifications
- The EUROclaus Concept
- Operating Parameters and Problems:
 - » H₂S / CO₂ Ratio Variability and control
 - » CO₂ Catalyst Effect
 - » Sulfur Dew Point, Acid Gas Containing Hydrocarbons
 - » Sulfur Product Specifications, Storage and Handling
- Claus Process Calculations and Exercises

DAY 05

Sulphur Recovery (II)

- Tail Gas: Process Selection, Handling and Treatment
- SCOT, Sulfreen, Cold Bed Absorption
- Iron Chelate Redox Processes
- LOCAT, SulFerox, Stretford, Selectox
- Selective Treating: Hindered Amines, Flexsorb Process
- Acid Gas Injection
- Membranes
- Emerging and New Technologies
- Troubleshooting: *what can go wrong*
- Programme review and evaluation

QUALITY CERTIFICATIONS & ACCREDITATIONS

The PMI® Registered Education Provider logo is a registered mark of the Project Management Institute, Inc.

Gas Processing

✓	Date	Venue	Fee(\$)
	07 - 11 Mar 2021	Dubai	US\$4,950
	26 - 30 Sep 2021	Dubai	US\$4,950

*This fee is inclusive of instruction materials, documentation, lunch, coffee/tea breaks & snack. All Fees are subject to 5% Value Added Tax (VAT).**

Your Details

Name (Mr/Ms):.....
Position:..... Organisation:.....
Address:.....

City / Country:
Telephone / Fax:

Mode Of Payment

- Please find enclosed a cheque made payable to EuroMaTech
 Please invoice me
 Please invoice my company as follows:

Contact Name:
Company Name:
Address:.....

Documentation

High Quality material has been prepared by the Seminar Leader for distribution to delegates. In addition, a special note pad to facilitate note taking will be provided.

Certificates

A Certificate of Completion will be issued to those who attend & successfully complete the programme.

Schedule

Our Course timings commences at 08:30 and concludes at 14:00, followed by lunch on a daily basis.

Hotel Accommodation

EuroMaTech has negotiated special rates for a limited number of rooms in the hotel. Early registration will help to secure a room at the reduced rate.

Registration & Payment

Please complete the registration form on this page & return it to us indicating your preferred mode of payment. For Further Information, Contact Your Nearest EuroMaTech Office.

Cancellation Policy

Request for seminar cancellation must be made in writing & received at EuroMaTech three weeks prior to the seminar date. A U.S.\$250/- processing fee will be charged per delegate for each cancellation. Thereafter, we regret that we are unable to refund any fees due, although in such cases we would be happy to welcome a colleague who would substitute for you.

Disclaimer

EuroMaTech reserves the right to alter the content, location of the Seminar, or the identity of the speakers in case of events beyond our control.

***VAT Announcement:** The Government of UAE have introduced Value Added Tax (VAT) on goods and services from 01-January-2018. In compliance with the legislation issued by the UAE Government, we will be applying a 5% VAT on the fees for all our programs and services offered from January 2018 as applicable and stipulated in the FTA circulars.
