

An Intensive 5-Day Online Training Course

Contractual Risk, Insurance and Indemnities

PROGRAMME SUMMARY

This EuroMaTech online training course starts by looking at how contracts are used to address and mitigate the impact of commercial and other risks, and to assist in the management of those risks that remain. It will explain how contracts are out together, and the additional issues that arise when contracting internationally.

It will then look at insurance arrangements within a contractual context, and how these interface with the indemnity regimes commonly found in many international contracts. Finally, it will address how to use the contract to minimise disputes, and various methods of resolving any disputes that do arise, including some alternative methods that are not traditional in commercial contracting, but are becoming more popular, such as mediation.

Date	Venue	Fee(\$)
04 - 08 Apr 2021	Live / Online	US\$ 2,400
26 - 30 Dec 2021	Live / Online	US\$ 2,400

INTRODUCTION

In every organisation, care is taken to manage risks by seeking to eliminate those that can be removed and reducing and managing the remainder. Part of this process involves developing robust contracts which apportion risk equitably and include a structure of indemnities with contractors, supported by a comprehensive insurance regime. In addition, it is important that contract personnel understand contractual risks and what insurance can (and cannot) do to remove the financial consequences of such risk; remembering always that insurance only mitigates the effect of risk, it does not make the risk itself go away.

This Contractual Risk, Insurance and Indemnities online training course is designed to:

- Provide an understanding of contract structures, and how and why contracts are drafted in particular ways
- Provide an understanding of some of the main clauses in different types of agreements
- Help participants to understand the meaning of insurance arrangements, and the terminology used
- Ensure participants appreciate the effect of insurance, and its limitations in the management of risk
- Explain how to use contract provisions to reduce the risk of disputes, and where disputes do arise, some of the methods by which disputes are resolved in international contracting

TRAINING METHODOLOGY

The Contractual Risk, Insurance and Indemnities online training course will combine conventional teaching with a high level of participation; including an interactive approach to involving participants in discussion of topics, exercises, and encouraging participants to bring their own experiences forward for discussion and debate.

WHO SHOULD ATTEND

This intensive EuroMaTech online training course is suitable for all personnel involved with contracting, whatever their background:

- Engineering
- Projects
- Construction
- Tenders
- Contracts
- Legal
- Insurance
- Risk Management
- Buying
- Purchasing

Those new to the function, preparing for a major project, or experienced managers looking for a refresher will also benefit from this EuroMaTech training course

PROGRAMME OBJECTIVES

- To provide a more in depth understanding of the elements of a contract
- To understand how to analyse complex contract documents, and the inter-relationship between clauses
- To understand how to develop effective indemnity regimes
- To understand the different types and forms of indemnities in different contracts
- To understand how to use indemnities to manage risks
- To understand the limitations of indemnity clauses
- To understand how to link indemnity and insurance arrangements
- To understand what types of insurance are available in a contracting context
- To understand how to develop insurance clauses
- To be aware of the latest thinking in dispute resolution techniques

In-house Training

EuroMaTech is capable of conducting this training programme exclusively for your delegates. Please e-mail us on inhouse@euromatech.ae for further information and/or to receive a comprehensive proposal.
