Stakeholders Management:

Achieving Consensus for Successful Project Execution

INTRODUCTION

Influencing, convincing and persuading all of the internal and external stakeholders such as client, contractors, consultants, vendors, teams are essential and critical for successful project and business as usual execution. It is a relationship game. Securing the buy-in of individuals confidently, skilfully and competently where you don't have direct authority and control can support a drive for operational excellence and business continuity. Tricky, challenging, demanding and complicated stakeholders could be driving the mission critical decisions. So managing effectively and navigating successfully the complex relationship between these stakeholders are essential for any business and project professionals.

Often stakeholders tend to bring in their own interest with hidden agendas, so normalizing the differences and achieving consensus for seamless are extremely crucial. The strategic project professional uses the views, interest and attitudes of stakeholders to shape a project at an early stage, keeping support throughout the lifecycle of their project and improving project deliverables down the line. Stakeholders Management is an essential skill set used frequently in meetings, business negotiations and when developing and communicating the business case for a new initiative.

WHO SHOULD ATTEND?

- Any Professionals / Teams involved in Projects and Business as usual Negotiators and Consultants
- Functional Team

PROGRAMME SUMMARY

Building consensus, properly managing stakeholder expectations, and translating a concept or initiative into a range of viable options for achieving organisational goals are all critical competencies for today's project managers. One of the most critical aspects of project management is doing what's necessary to develop and control relationships with all individuals that the project impacts. This course will take the delegates through the techniques for identifying stakeholders, analyzing their influence on the project, and developing strategies to communicate, set boundaries, and manage competing expectations.

Stakeholder management is critical to the success of every project in every organization. By engaging the right people in the right way in your project, you can make a big difference to its success. By successfully managing your stakeholders, you will be better able to keep a lid on scope creep, ensure project requirements are aligned, understand tolerance for risk, and mitigate issues that would otherwise delay the project. Good stakeholder management is a testimony to your influence in an organization, and a key component to a healthy project environment.

A key factor in the success of a project is managing stakeholder needs, wants and expectations. During this practical course you'll learn how to identify key stakeholders and define their roles, establish how committed are they to the project, align and prioritise stakeholder requirements to business and organisational objectives, and gain 'buy-in'.

IN-HOUSE TRAINING

EuroMaTech is capable of conducting this training programme exclusively for your delegates. Please e-mail us on inhouse@euromatech.ae for further information and/or to receive a comprehensive proposal.
