

An Intensive 5-Day Training Course

Firefighting System Design & Review for Oil and Gas Industry

PROGRAMME SUMMARY

This EuroMaTech training course on firefighting system design & review for oil and gas industry covers a comprehensive discussion on the complexity of firefighting system designs in refineries with reference to standards such as the NFPA. This training course gives understanding to apply firefighting system designs specific in Oil and Gas and review of the facility in compliance with the standards.

Date	Venue	Fee(\$)
04 - 08 Apr 2022	London	US\$ 5,950
20 - 24 Jun 2022	London	US\$ 5,950

INTRODUCTION

There are many hazardous fluids & gases present or generated in oil & gas plants or refinery units. These fluids & gases can be flammable or inflammable in nature and can cause fire. To prevent fire from happening, the facility is to be protected with some fire protection system that is provided based on the hazardous nature of the fluids & gases in order to prevent a catastrophic loss of people, facilities and equipment. Firefighting system design in plants are essential to provide and enhance firefighters to deal more effectively with fire.

This EuroMaTech training course will cover firefighting system and design criteria in oil and gas plants referring to The National Fire Protection Association (NFPA) standard and SHELL DEP covers:

- Design and calculation fire protection system
- Fire safety assessment
- Fire water system designed to meet the fire water flow requirement
- Inspection, test and maintenance fire protection system

This training course will develop the participants' abilities and skills to design, review and test firefighting system to mitigate risks and help prevent disasters in facilities - destroying the assets and causing pollution to the environment & fatality to human life.

Participants attending this Firefighting System Design & Review for Oil and Gas Industry training course will develop the following competencies:

- Firefighting system active and passive and its application refer to NFPA and Shell DEP
- Fire safety assessment with rating system calculation
- Fire water system with design and calculation
- Sprinkler system included design and calculation
- Fire protection system and maintenance

Virtual
learning service
available

TRAINING METHODOLOGY

This EuroMaTech training course will combine presentations with instructor-guided interactive discussions between participants relating to their individual interests. Practical exercises, video material and case studies aiming at stimulating these discussions and providing maximum benefit to the participants will support the formal presentation sessions.

In-house Training

EuroMaTech is capable of conducting this training programme exclusively for your delegates. Please e-mail us on inhouse@euromatech.ae for further information and/or to receive a comprehensive proposal.

WHO SHOULD ATTEND

This Firefighting System Design & Review for Oil and Gas Industry training course is suitable for a wide range of professionals, but will be particularly beneficial to:

- Firefighters in Oil and Gas industry
- Technical fire prevention Engineers in refinery or gas plant
- Firefighting System Design Engineer

PROGRAMME OBJECTIVES

This EuroMaTech training course aims to help participants to develop the following critical objectives:

- Understanding the design for fire protection system in refineries, with reference to NFPA and Shell DEP
- Be able to design and calculation fire protection system
- Be able to perform fire safety assessment
- Be able to inspection, test and maintenance fire protection system
- Be able to review fire protection system

QUALITY CERTIFICATIONS & ACCREDITATIONS

COURSE OUTLINE

Day 1

Firefighting System in Petroleum Refinery

- Introduction firefighting system (passive and Active systems)
- The key elements of active and passive fire protection
- Designing passive and active fire protection systems
- International fire design codes NFPA
- SHELL DEP and its application in oil industry firefighting system design

Day 2

Fire Safety Assessment

- Fire risk
- Fire design
- The Performance based fire safety design
- Fire rating systems and calculation
- Fire testing

Day 3

Fire Water System in Oil and Gas

- Fire water demand calculations
- Firewater network design calculations
- Fire water suppression system
- Fire water storage
- Fire water pumps

Day 4

Sprinkler System in Oil and Gas Plant

- Type of sprinkle systems
- Sprinkler system design
- Sprinkler design calculations
- Sprinkler system inspection, maintenance and testing

Day 5

Fire Protection System

- Hydrocarbon tank fire protection and design calculations
- Hydrocarbon processing plant and design calculations
- Maintenance and test stand pipe system
- Maintenance and test fire alarm system

Firefighting System Design & Review for Oil and Gas Industry

✓	Date	Venue	Fee(\$)
	04 - 08 Apr 2022	London	US\$ 5,950
	20 - 24 Jun 2022	London	US\$ 5,950

This fee is inclusive of instruction materials, documentation, lunch, coffee/tea breaks & snack. All Fees are subject to 5% Value Added Tax (VAT).*

Documentation

High Quality material has been prepared by the Seminar Leader for distribution to delegates.

Certificates

A Certificate of Completion will be issued to those who attend & successfully complete the programme.

Schedule

Our Course timings commences at 08:30 and concludes at 14:00, followed by lunch on a daily basis.

Hotel Accommodation

EuroMaTech has negotiated special rates for a limited number of rooms in the hotel. Early registration will help to secure a room at the reduced rate.

Registration & Payment

Please complete the registration form on this page & return it to us indicating your preferred mode of payment. For Further Information, email us at info@euromatech.ae.

Cancellation Policy

Request for seminar cancellation must be made in writing & received at EuroMaTech three weeks prior to the seminar date. A U.S.\$250/- processing fee will be charged per delegate for each cancellation. Thereafter, we regret that we are unable to refund any fees due, although in such cases we would be happy to welcome a colleague who would substitute for you.

Disclaimer

EuroMaTech reserves the right to alter the content, location of the Seminar, or the identity of the speakers in case of events beyond our control.
