

An Intensive 10-Day Training Course

The 10-day Quality Assurance and Concepts of ISO Standardisation Programme

PROGRAMME SUMMARY

This EuroMaTech training course will set any business on the path to achieving the quality demanded by customers. Quality Management ensures that your customers always receive the product or service that meets or exceeds their expectations. It decreases time to market and so helps in promoting international trade and enhancing marketing.

Implementation of Quality Management in a product or service lifecycle will actually deal with the root cause of problems, by decreasing rework, manpower usage, and increasing productivity, process improvement, providing better Customer Satisfaction and thus retaining the customer's in the existing competitive market.

Date	Venue	Fee(\$)
28 Nov - 09 Dec 2022	London	US\$ 11,900

INTRODUCTION

The foundation of a quality organisation is an effective quality management system. A quality management system (QMS) is a formal process used to review the operations, products and services of a business – with the objective being to assure customers that they will receive exactly what they ordered and to identify areas that may require improvement.

Quality management systems are required in all areas of business activity. A good quality management system will: reduce wastage, improve process control, increase market share, lower costs, facilitate training, meet customers' expectations and raise staff morale. This fast-paced EuroMaTech training course will give participants a thorough grounding in standardization and quality systems.

Participants attending the Quality Assurance and Concepts of ISO Standardisation training course will develop the following competencies:

- Demonstrate confidence in dealing with quality systems and challenges
- Understanding how to increase quality through better management of key processes
- Ability to analyse ways to achieve consistent customer satisfaction and loyalty
- Understanding of the options that are available to achieve quality in their own departments and in the whole organisation

Virtual learning service available

TRAINING METHODOLOGY

The Quality Assurance and Concepts of ISO Standardisation training course is highly practical and participative. All theory is backed with interactive exercises, which enable participants to gain confidence in using the methods presented and with case study examples and videos. They also get opportunities to observe and give feedback to other participants about their quality and problem solving skills, thus reinforcing their own learning experience, plus plenty of coaching feedback from the trainer.

WHO SHOULD ATTEND

- Leaders wishing to introduce quality management into their own team
- Professional in any organization seeking quality registration and certification
- Business professionals with specific responsibilities for Quality and Customer Satisfaction
- Personnel new to any Quality Assurance role, as well as more experienced managers seeking to examine and enhance their quality skills

PROGRAMME OBJECTIVES

By the end of the Quality Assurance and Concepts of ISO Standardisation training course participants will be able to:

- Identify a wide range of quality management approaches and tools to participants
- Determine which processes need to be managed to achieve consistent quality
- Analyse ways in which quality processes are managed
- Analyse root causes and solve quality problems
- Assess their own quality management skills and plan to remedy any gaps
- Cope effectively with any quality challenge, choosing appropriate tools and techniques

In-house Training
